EDUCATION

B.Tech. in Computer Engineering	CGPA: 8.72/10 2022 – 2026
J.C. Bose University of Science & Technology, YMCA, Faridabad	
Senior Secondary (Class XII) – CBSE (PCM)	Percentage: 92% 2022
Rigveda International School, Tohana, Haryana	
Secondary (Class X) – CBSE	Percentage: 95.8% 2020
Rigveda International School, Tohana, Haryana	

SKILLS

Programming Languages & Frameworks: Python, SQL, Pandas, NumPy, Scikit-learn, PyTorch, Hugging Face, Flask.
AI, GenAI & Intelligent Systems: Custom Chatbots (Prompt Engineering), MCP Servers, LLM Applications, RAG.
SAP & Enterprise Technologies: SAP BTP, SAP BPA, SAP AI Core, SAP Joule Skills and Agents, SAP CDS Views
Tools & Platforms: Microsoft Excel, Power BI, GitHub, JIRA, Figma, Linux.
Core Concepts & Fundamentals: Machine Learning, Deep Learning, NLP, EDA, Data Structures, Web Scraping.

EXPERIENCE

1. **KPMG India — Analyst Intern** (JAN 2026 – Present)
- Configured and implemented **SAP Joule** in the system, developing Joule skills and agents for SD & MM processes using standard and custom OData services built with **SAP CDS Views** (end-to-end CRUD operations)
 - Built and deployed custom **MCP servers** integrating enterprise OData/APIs with Claude AI, enabling LLM-driven workflows and deployed on SAP BTP for seamless Joule integration
 - Engineered **RAG-based enterprise chatbots** for document and code retrieval, enabling contextual understanding and executing action-based workflows from natural language queries
 - Automated business processes using **SAP Build Process Automation (RPA)** for client projects.

PROJECTS

1. **Price Predictor for Amazon Products** - *Amazon ML Challenge 2025 – Top 500 rank out of 6,500 submissions*
 - Worked on a large-scale dataset of **75K Amazon products**, each containing textual descriptions and images.
 - Processed descriptions using **feature engineering and NLP techniques** to extract text representations.
 - Converted **images and text into embeddings** using **pretrained open-source models** for multimodal learning.
 - Trained an **Artificial Neural Network (ANN)** on combined embeddings to predict product prices, achieving **~80% accuracy** on a large **75K-row test dataset**.
2. **Chat Analyzer and Call Transcription Platform**

Key Skills: Python, Flask, Pandas, NLP, Transformers (BERT), Whisper ASR, Wave2Vec, Librosa, Matplotlib

 - Performed structured WhatsApp chat analysis using Pandas to compute message counts, media stats, activity patterns, and temporal insights.
 - Conducted analysis using a BERT encoder model to classify messages into domains and detect emotions.
 - Implemented Speaker Diarization for call audio using Librosa-based segmentation, Wave2Vec embeddings, clustering, and Whisper ASR for generating speaker-wise transcripts

CERTIFICATIONS

- Diploma in Data Science from IIT Madras
- Diploma in Programming from IIT Madras

ACHIEVEMENTS

- Secured **top-500** rank out of 6,500 submissions in **Amazon ML Challenge 2025**, as part of a 3-member team.
- Member of University Coding clubs – Manan The Technosurge and GeeksMan-The Coding Club.
